Education

2011–2016	**Master in Architecture of Information Systems**, *INSA de Rouen*, Rouen. Algorithms, Software Engineering, Networks, Databases, UML
2011	**Baccalauréat**, *Lycée Jean Giraudoux*, Châteauroux, *Honours*. High school diploma in science

Experience

2014–2015 Developer, Admin Sys, *INVOKE - INSA de Rouen*.
- Developped a SVG charts creation library in ISO 9001:2008 certified project
- Designed the software with UML, managed continous integration and testing
- Programmed in C++, compiled in JavaScript with the Emscripten compiler
- Managed the team systems, server and network access

Team work — Quality management — Software Design

Summer 2015 Software Engineer Intern, *Siraga SA*.
- Quickly familiarized with microcontroller programming
- Created a communication library between Microchip Pic18 and MIPEX infrared gas sensor
- Wrote a multi-protocol API for Human-Machine Interface with LCD displays
- Produced and tested a prototype with the team in the workshop

Autonomy — Low level programming — Industrial computing

2013–2015 Project Manager, *Quantic Telecom*.
- Grew from 0 to 600+ members to become France's largest non-profit Internet Service Provider
- Managed projects wiring and connecting several building to our network
- Designed network architecture, installed antenna in weird and unexpected places

Communication — Thinking outside of the box — Personnal investment

Skills

Programming	Languages
- C, C++, Java - HTML5, CSS3, Javascript & PHP basics - Interested in Haskell and Rust	- French (native language) - English (fluent - TOEIC 930/990) - Spanish (school level)

Systems & Softwares	Code Quality
- Linux (Ubuntu, **ArchLinux**) - Vim, Docker, NginX	- Git - Code reviews - Continous integration

Interests

Music	Composing and recording songs, performing live with other musicians
IT eve	Staying aware of what's going on in the industry by reading numerous amount of blogs posts and tweets
